# Mayor and Executive Committee's report and endorsement

The annual financial statements of Reykjavíkurborg (the City of Reykjavík) for the year 2015 were prepared in accordance with the Local Government Act, the Act on Financial Statements and the Government Regulation on Municipal Accounts, Budget and Financial Statements. Details of accounting methods are provided in the financial statements.

The activities of the City of Reykjavík, are divided into A and B operations, i.e. Reykjavík Municipal (A operations) and Reykjavik Group (A and B operations). Reykjavík Municipal comprises activities which are funded in part or in full through tax revenues. B operation companies are companies in which the City holds half of the shares or more and which are operated as financially independent units.

According to the Income Statement for Reykjavík Municipal, operating income amounted to ISK 91,035 million in 2015, of which tax revenues accounted for ISK 69,285 million. The municipal income tax rate was 14.52%, which is the statutory maximum. The property tax rate was 0.20% for tax class A, 1.32% for tax class B and 1.65% for tax class C. The maximum statutory rates are 0.625%, 1.32% and 1.65% for tax classes A, B and C, respectively. Total operating revenue for the consolidated Reykjavik Group amounted to ISK 143,927 million over the year.

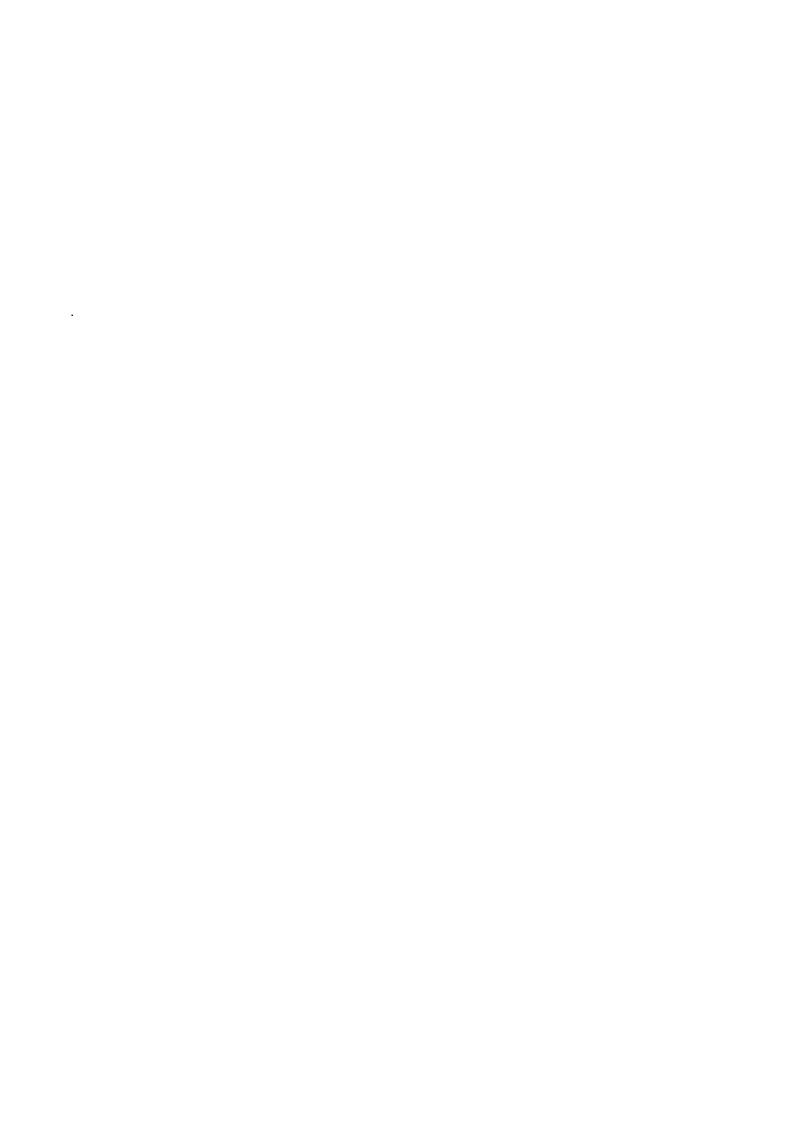

The operating result for Revkiavik Municipal (A operations) amounted to a loss of ISK 13,636 million, whereas the budget for the fiscal year projected a loss of ISK 622 million. The operating result for Reykjavík Group (A and B operations) amounted to a loss of ISK 4,980 million, whereas the year's budget projected a profit of ISK 7,392 million. The reasons that operating results were worse than anticipated are attributed mainly to changes in pension obligations amounting to ISK 14,667 million, while the budget estimate was ISK 2,399 million, see note 25.

The total assets of Reykjavík Group (consolidated A and B operations) according to the balance sheet at year-end 2015 amounted to ISK 525,560 million, and total liabilities amounted to ISK 301,553 million. Equity amounted to ISK 224,007 million, of which minority interests amounted to ISK 12,700 million.

On 1 December 2015 the population of the City of Reykjavik was 122,452.

For the evaluation of pension obligations of A operations, it is assumed that the national mortality rate will continue to decrease and that life expectancy will increase instead of basing assumptions on the experience of previous years. The effect of these changes in assumptions is estimated at ISK 6,509 million, which is recognized in the income statement. It is the assessment of management that these assumptions provide a clearer view of the pension obligations of A operations at year-end 2015 and that the City of Reykjavik is required to take them into consideration according to the

Act on Financial Statements, see notes 25 and 44.
According to the best knowledge of the Mayor and the Executive Committee, the financial statements have been prepared in accordance with law and give a true and fair view of assets and liabilities, the financial status and operating results of Reykjavik Municipal and Reykjavik Group. Furthermore, the report of the Mayor and Executive Committee contains the required information.
The Executive Committee agreed at its meeting on 14 April 2016 that the financial statements of the City of Reykjavik for the year 2015 are ready for auditing and due process before the City Council in accordance with Article 61 of the Local Government Act No. 138/2011.
Reykjavík, 28 April 2016.
Mayor
Executive Committee

# **Endorsement by the City Council**

The financial statements of Reykjavíkurborg (the City of Reykjavík) for the year 2015 have been discussed by the City Council in accordance with Article 61 of the Local Government Act No. 138/2011 and is confirmed and endorsed at the second debate in the City Council.

Reykjavík, 10 May 2016.

City Council:

# **Independent Auditor's Report**

# To the City Council of Reykjavíkurborg

We have audited the accompanying financial statements of Reykjavíkurborg for the year 2015 which comprise the financial statements of A operations and the financial statements of A and B operations. The financial statements comprise income statement, balance sheet, statement of cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

# The City Council and Mayor's Responsibility for the Financial Statements

The City Council and Mayor are responsible for the preparation and fair presentation of these financial statements in accordance with Icelandic Financial Statements Act No. 3/2006, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

# **Auditor's Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the financial statements give a true and fair view of the municipality's financial performance in the year 2015, its financial position as at 31 December 2015, and of its cash flows for the year then ended in accordance with the Icelandic Financial Statements Act.

#### Report on the Mayor and Executive Committee's report

Pursuant to the legal requirement under Article 104, Paragraph 2 of the Icelandic Financial Statements Act No. 3/2006, we confirm that, to the best of our knowledge, the report of the Mayor and Executive Committee accompanying the financial statements includes the information required by the Financial Statements Act if not disclosed elsewhere in the financial statements.

Reykjavík, 10 May 2016.

KPMG ehf.

# Information

1. Reykjavíkurborg (the City of Reykjavík), the capital of Iceland, is a municipality with a population of 122,452, as at 1 December 2015. The municipality's offices are located in Reykjavík City Hall.

The principles of administration and operation of local governments are provided for in the Local Government Act No. 138/2011.

# **Basis of preparation**

2. The financial statements of Reykjavíkurborg (the City of Reykjavík) include annual accounts for the operating units pertaining to Reykjavík Municipal (A operations) and a consolidated statement for the City's entire operations, Reykjavík Group (i.e. consolidated A and B operations), as stipulated in Article 60 of the Local Government Act No. 138/2011.

Reykjavik Municipal comprises activities which are partly or entirely funded by tax revenues. These include Aðalsjóður (the City's Operation Fund), Eignasjóður (Real Estate Fund) and Bílastæðasjóður (Parking Fund). B operations comprise financially independent companies where the City holds 50% of the shares or more. These companies are largely funded by income generated by the services they provide. The companies in B operations are Aflvaki hf. (development/investment agency), Faxaflóahafnir sf. (Associated Icelandic Ports), Félagsbústaðir hf. (Reykjavik Social Housing), Íþrótta- og sýningahöllin ehf. (Sport and Exhibition Centre), Jörundur ehf. (real estate), Malbikunarstöðin Höfði hf. (Asphalt Station Hofdi), Orkuveita Reykjavíkur (Reykjavik Energy), Slökkvilið höfuðborgarsvæðisins bs. (Capital District Fire and Rescue Service), Sorpa bs. (Capital Area Waste Disposal Company) and Strætó bs. (Metropolitan Bus Transportation Company).

The financial statements have been prepared on the historical cost basis and comply with the Local Government Act, the Financial Statements Act No. 3/2006, Regulation No. 696/1996 on the presentation and contents of financial statements and consolidated financial statements, and Regulation No. 1212/2015 on the accounting, budgeting and financial statements of municipalities.

Included in the consolidated financial statements for Reykjavik Group are the financial statements of Orkuveita Reykjavíkur and Félagsbústaðir hf., which have been prepared in accordance with International Financial Reporting Standards (IFRS). The most significant deviations from the accounting policies for municipalities are:

- a part of fixed tangible assets has been restated at fair market value;
- embedded derivatives are stated at fair market value;
- shares in companies are stated at fair market value;
- other assets and liabilities are stated at fair market value;
- the operating lease agreement of Orkuveita Reykjavikur for its headquarters is not included in the balance sheet.

The financial statements of Orkuveita Reykjavíkur and Félagsbústaðir hf. are included unchanged in the consolidated financial statements of Reykjavík Group. The financial statements are largely based on the same accounting policies as the previous year.

Balances between Reykjavik Municipal entities and inter-unit transactions are eliminated in the financial statements for Reykjavik Municipal. Balances between A operation and B operation entities and inter-unit transactions are eliminated in the consolidated financial statements. Balances between operating entities and inter-unit transactions include real estate tax levies, rent collected by the Real Estate Fund and other inter-unit transactions relating to purchases of goods and services. They also include interest calculated on balances and long-term liabilities resulting from transfers of assets and investments.

# **Accounting methods**

# **Income recognition**

3. Tax revenues are recognised on the date of levying, but balancing provisions are made for uncollected tax revenues. Tax revenues include municipal income tax, property tax and contributions to and from the Municipal Equalisation Fund, in addition to other revenues which are equivalent to taxes, such as plot rents.

Capital expenditure and collection of construction fees are recognised in the Income Statement as decrease to construction costs and are recognised as a deduction from depreciation over the assets' anticipated useful life. Proceeds from sale of goods and services are generally recognised in the Income Statement at the time that ownership and the right to claim have been transferred to the buyer. The same applies to grants.

Accrued interest income is recognised in the Income Statement based on the principal of debt and the terms of interest-bearing claims. Dividends are recognised in the Income Statement on the date of dividend declaration.

Profit or loss on the sale of fixed tangible assets is the calculated difference between their selling price and book value. The difference is recognised in the Income Statement as operating revenues or expenses accordingly.

#### **Expense recognition**

4. Expenses are recognised in the Income Statement at the time that they are incurred and the right to claim has been transferred to the seller.

#### Indexation and exchange-rate criteria

5. Assets and liabilities which are indexed or denominated in foreign currency are converted recognised in the financial statements at the indexation or exchange rate applying at year-end 2015. Accrued indexation and exchange-rate differeces are recognised in the Income Statement.

#### **Intangible assets**

6. Geothermal rights are capitalised in the Balance Sheet as an intangible asset at their depreciated cost price. Geothermal rights are separated from land on acquisition. Preparation costs are capitalised in the Balance Sheet as intangible assets if there is a reasonable probability that the work will generate revenues later. Cost is expensed over the projected utilisation time. Other intangible assets are assessed at cost value, net of accrued depreciation and impairment.

#### Capitalisation of fixed tangible assets

7. Fixed tangible assets, other than plots and land for which the municipality receives lease income, are recognised as assets at cost net of depreciation based on their estimated useful life. The cost of operational assets consists of their purchasing price and the costs incurred from their acquisition and improvements. Purchases of tools and equipment for Reykjavik A operation under ISK 2.5 million are expensed, with the exception that equipment which is subject to compulsory registration is capitalised.

Leased assets are real estate that the municipality leases pursuant to lease agreements with a minimum term of three years and no option of termination by the municipality within a year from their starting date. Orkuveita Reykjavikur applies IFRS accounting policies when assessing whether assets leased by the company are recorded as leased assets.

The cost of a leased asset is regarded as its fair value on the date of the contract or the net present value of the minimum lease payments under the lease agreement, if lower.

Plots and land for which the municipality receives lease income are entered at fair value or net present value of future revenues pursuant to the current lease agreements, if lower. Plots and land are revalued on a regular basis. Revaluation of plots and land is recognised as equity.

The distribution and production systems of Orkuveita Reykjavikur and operational assets of Íþrótta- og sýningahöllin ehf. are recognised at restated value in the Balance Sheet for Reykjavik Group, which is their fair market value on the restatement date, net of any additional depreciation from that time. Revaluation of these assets is undertaken on a regular basis. All increases in valuation are recognised as equity. Depreciation on the restated value is entered in the Income Statement.

Investment properties are real estate of Félagsbústaðir hf. owned by the company with the object of raising rent revenue. Investment properties are recognised at fair value in accordance with International Financial Reporting Standards (IFRS). The evaluation of investment properties is based on the oficial real estate evaluation of the Icelandic National Registry. According to information from the National Registry, the official real estate evaluation is fair value estimated in real estate market transactions. The evaluation is performed in May each year based on pricing in February of the same year. The newly calculated evaluation comes into effect at the end of the year. The real estate evaluation covers both the buildings and the plots and is divided into building evaluation and plot evaluation. The real estate evaluation is extrapolated based on the building cost index until the end of the year. Changes in the evaluation of investment properties are recognised under the item value adjustment of investment properties income statement. Investment properties are not amortised.

#### **Financial instruments**

8. Financial instrument is categorised as financial asset or liability at fair value in the Income Statement in the case of trading assets or trading liabilities, or if they are recognised as financial instruments at fair value in the Income Statement at their initial entry in the accounts. Financial assets and liabilities at fair value in Orkuveita Reykjavikur's Income Statement are recognised at fair value in the Balance Sheet. Changes in fair value are recognised in the Income Statement.

Embedded derivatives are separated from the host contract and recognised separately if the economic characteristics and risks of the host contract and the embedded derivative are not closely related, another instrument with the same provisions as the embedded derivative would be defined as a derivative, and the mixed contract is not recognised at fair value in the income statement. Orkuveita Reykjavikur uses derivatives to hedge against currency, interest and aluminium price risk. Derivative contracts are recognised at fair value in the Balance Sheet, and changes in fair value are recognised in the Income Statement.

#### Depreciation of fixed tangible assets, other than leased assets

9. Depreciation is calculated as a fixed percentage based on the estimated useful life of the asset until scrap value is reached. In general, scrap value corresponds to one-year's depreciation, not exceeding 10% of the original price. Plots and land from which the municipality generates lease revenue are not depreciated. The estimated useful life of fixed assets is as follows:

General purpose buildings, offices and schools	25-50 years
Other buildings	25-50 years
Plots and land for planning	25 years
Road system	25 years
Orkuveita Reykjavikur, distribution systems	5-50 years
Orkuveita Reykjavikur, production systems	5-50 years
Orkuveita Reykjavikur, geothermal rights	100 years
Vehicles, machinery and equipment	3-15 years

# Depreciation of leased assets

10. The depreciation of leased assets is calculated as a fixed percentage based on lease period or estimated useful life, if shorter. If it is known that the municipality will acquire the leased asset at the end of the lease period, the useful life of the asset in question is used. In general, residual value corresponds to one year's depreciation, not exceeding 10% of the original price. The estimated useful life of leased assets is as follows

Real estate. 4-26 years

#### **Shares in companies**

11. In the financial statements of Reykjavík Municipal, shares in companies, co-owned municipal agencies and own enterprises are entered at cost, although the book value at year-end 2001 remains unchanged in the financial statements. The financial statements of Reykjavik Municipal focuses primarily on the use of tax revenues, and therefore shares in the results of other companies are not recognised. Contributions from Reykjavik Municipal to the operations of co-owned B operations companies constitute part of the cost of the respective segments of Reykjavik Municipal.

In the consolidated financial statements of Reykjavik Group, shares in associated companies are recognised according to the equity method. The equity method entails that the City's share in the results and equity of associated companies is recognised in the financial statements. The fair value of shares categorised as financial assets for sale is determined through recognised evaluation methods, except in cases where the price in recent transactions is used as a reference. Other equity shares are recognised at cost.

Depreciation of shares in companies that have been subject to impairment is calculated and recognised in the financial statements following a valuation.

#### Long-term receivables

12. Long-term receivables are recognised in the Balance Sheet in accordance with their credit terms, less a provision for losses. Current maturities and payments in arrears are recognised among current assets in the Balance Sheet.

# **Provision for losses**

13. Long-term receivables, outstanding tax revenue and other short-term receivables have been evaluated with regards to risk of loss and a provision is made in the financial statements with an indirect deprication. This provision does not represent a final write-off but a reserve is created to meet possible losses. Changes in the provision based on actual losses during the year are recognised in the Income Statement.

#### **Inventories**

14. Inventories are valued at cost price, taking into consideration defective and obsolete goods.

#### Short term receivables

15. Short term receivables are recognised at nominal value, less exchange rate differen and accrued interest in the case of interest-bearing receivables. A provision has been made to meet possible losses.

# Cash and cash equivalents

16. Cash and cash equivalents consist of cash, demand deposits with banks and market securities.

# **Assets off the Balance Sheet**

17. Land and plots owned by Reykjavik Municipal that are not leased and investments in traffic infrastructure before the beginning of 2002 are not recognised in the balance sheet.

#### **Obligations**

18. Pension obligations for the benefit of the City's employees are recognised as a long-term liability in the Balance Sheet based on actuarial review. Changes in the liability during the year are recognised in the Income Statement, see note 44.

# Deferred income tax liability and assets

19. The deferred income tax liability and assets of entities in B operations which are subject to income tax, have been calculated and recognised in the financial statements. The calculation is based on the temporary difference between the tax return on the one hand, and the financial statements, on the other hand. This difference is due to the fact that tax assessments are based on rules which differ from those governing financial statements.

According to the current tax legislation, transferable tax losses can be used against taxable revenues 10 years from their formation. The application of transferable tax loss has been assessed and calculations have been made regarding taxable

revenues for the next few years. The income tax balance for transferable loss is recognised to the extent that it is believed

# Long-term liabilities

**20.** Long-term liabilities are recognised in the Balance Sheet at year-end in accordance with the applicable credit terms. Next year's instalments are recognised as short-term liabilities.

#### Lease debts

to be of use.

21. At the original recognition of an obligation relating to lease agreements, the lease debt is entered at the fair value of the leased asset or the net present value of the lease agreement, if lower. Minimum lease payments are divided into interest costs and instalments on the balance of debts. The interest costs are spread over the lease period based on effective interest.

Minimum lease payments are the payments that a lessee is required to pay during the contract term, excluding conditional rent, as well as maintenance, service costs, insurance and taxes, which are paid by the lessor. Orkuveita Reykjavikur applies IFRS accounting policies when assessing whether a lease debt should be recognised in the balance sheet. Calculation of the net present value of minimum lease payments is based on the lessor's required rate of return when it can be determined; if not, the net present value is based on the credit terms of the municipality for new capital at the date of the contract.

# Budget

22. The budget with annexes for the year 2015 is a part of the financial statements and is included in the income statement, statement of cash flow and in the notes. The originally approved budget is displayed, as well as the approved annexes and the budget with annexes in notes 61 and 62.

#### **Statement of Cash Flows**

23. Investments affecting net cash are recognised among investment activities in the Statement of Cash Flows.

Book value 31.12.2015	0	53,494,476

The presentation of Félagsbústaðir hf is based on fair value measurement. Valuation changes resulting from fair value measurements are recognised in the Income Statement.

Orkuveita Reykjavikur performs a special re-evaluation of its production systems and the re-evaluation extends to assets used for the production of electricity, hot water and cold water.

The fair value of production assets is determined by the depreciated and restated cost price. This entails that changes in the building cost of similar assets are assessed and both the cost price and accumulated depreciation are re-assessed in accordance with those changes.

The same method is applied in determining the fair value of Orkuveita Reykjavikur's distribution systems, which have been subject to a special re-evaluation. Re-evaluated distribution systems are used for operations that require special permits, and the income limit is primarily based on changes in the building cost index. This is taken into consideration when determining fair value.

The re-evaluation during the year led to an increase in the recorded price by ISK 10,300 million.

Orkuveita Reykjavíkur depriciated assets under construction by ISK 1,240 million.

The permanent fixed assets of Íþrótta- og sýningahöllin hf. are recognised at the re-evaluated cost price, net of depreciation; re-evaluation for the year amounted to ISK 71 million.

Orkuveita Reykjavíkur has entered into an agreement on the purchase of two 45MW turbine units for power plant construction. According to the agreement, Orkuveita Reykjavíkur must confirm the purchase of the turbine units before 1 June 2016, or the agreement may be terminated. The outstanding amount of the agreement is approximately ISK 6.6 billion. The cost of terminating the agreement would be negligible.

31. Leased properties of A operations are specified as follows:		(A operations)

38. Orkuveita Reykjavikur has entered into four aluminium price related power sale agreements for an initial period of 20 years, one with Landsvirkjun relating to Norðurál and three with Norðurál relating to the aluminium smelter at Grundartangi, as well as agreements with Landsnet hf. concerning power transmission. Orkuveita Reykjavikur and Norðurál have also entered into a power sale agreement concerning power sales to the planned aluminium smelter in Helguvík and delivery pursuant to that agreement has begun but the agreement has a term of 25 years. These power sale agreements are made in USD and the power price is linked to the world market price of aluminium. In order to reduce the aluminium price risk, Orkuveita Reykjavíkur has entered into derivative agreements to reduce fluctuations in revenues linked to aluminium prices. The risk management department of Orkuveita Reykjavíkur is authorised to hedge the aluminium price risk for up to 5 years. At the accounting date the hedging amounted to 43% of the estimated sales linked to the price of aluminium for the next 12 months. Power sale agreements linked to aluminium prices entail embedded derivatives, as their revenues are subject to future changes in the world market price of aluminium. In accordance with the provisions of international financial reporting standards on financial instruments the fair value of embedded derivatives concerning Grundartangi, and partially concerning Helguvík, has been evaluated and recognised in the financial statements

As the market price for embedded derivatives is not known, their fair value has been estimated using accepted evaluation methods. The expected present value of the cash flow of agreements has been determined based on the forward price of aluminium on the London Metal Exchange at the accounting date and expectations regarding the price trend of aluminium for the next 25 years. This is based on the assessment of CRU, an independent analyst, as available on the accounting date. The present value cash flow of agreements on the settlement date, based on aluminium prices which were the basis on the starting date of the agreements, has been subtracted from the present value of cash flow on the accounting date. The difference is the fair value of the derivative. This is based on the assumption that the derivative has no value on the starting date of the agreement.

Embedded derivatives in power sale agreements that are recognised in the financial statements are recorded as assets or liabilities in the balance sheet at fair value on the accounting date and the changes to the fair value over the year are recognised in the income statement as income and expenses on financial assets and financial liabilities.

Fair value of embedded derivatives in electricity sales contracts is specified as follows:	2015	2014
Fair value of embedded derivatives in electricity contracts at the beginning of the year	(3,027,689)	417,739
Fair value changes during the year	(10,164,474)	(3,445,428)
Fair value of embedded derivatives in electricity contracts at the end of the year (liability)	(13,192,163)	(3,027,689)
The allocation of embedded derivatives in electricity sales contracts is specified as follows:		
Non-current embedded derivatives (liability)	(11,095,112)	(2,377,756)
Current embedded derivatives (liability)	( 2,097,051 )	(649,933)
Total embedded derivatives	( 13,192,163 )	(3,027,689)

Among the embedded derivatives of power contracts is a contract with Norðurál Helguvík ehf. ("NH") in the amount of minus ISK 2.7 billion. Construction work relating to an aluminium smelter at Helguvík has been significantly delayed and there is some uncertainty regarding the future of the project. The plan was to deliver power to the aluminium smelter on 1 September 2011 and NH's payment obligation started on that date. NH has used provisions of the contract to divert the power to the aluminium smelter at Grundartangi.

# Long-term receivables

39. Long-term receivables are specified as follows:

Long term claims of A operations against B operations' companies	2015	2014
Claims against B operations, indexed, 4% interest rate	0	1,163,276
Subordinated loan to Orkuveita Reykjavíkur, indexed, 3.05%-4.25% interest rate	12,825,889	12,574,986
	12,825,889	13,738,262
Current maturities of long term claims	( 646,992 )	0
Total long-term claims against B operations' companies	12,178,896	13,738,262
Annual maturities are specified as follows:		
2016	646,992	0
2017	862,653	627,854
2018	1,154,143	913,898
2019	1,251,306	1,196,767
2020	1,251,306	1,196,767
Later	7,659,488	9,802,975
Total long-term receivables against B-operations' companies	12,825,889	13,738,262

<b>39.</b> Other long-term receivables are specified as follows, cont.:	Reykjavik Municipal	Reykjavik Group
Other long-term receivables	(A operations)	(A and B operations)
Receivables from other companies	4,477,294	13,795,234
Provision for losses	(1,794,691)	(1,794,691)
·	2,682,603	12,000,543
Next year's payments on long-term receivables	(646,350)	(9,512,263)
	2,036,253	2,488,280
Annual maturities are specified as follows:		
2016	646,350	9,512,263
2017	266,284	384,025
2018	275,156	387,859
2019	244,918	317,904
2020	243,203	310,189
Later	2,801,383	2,882,994
Total, other long-term receivables	4,477,294	13,795,234

The long-term receivables in the consolidated financial statements include a bond recognised at market value in the income statement. The bond is denominated in USD and carryies 1.5% interest. The loan is a bullet bond in the amount of ISK 8.7 billion, due in December 2016. The bond is linked to the price of aluminium to a certain extent and secured by a collateral in shares in HS Orka hf. The bond is recognised at market value in the income statement and derivatives are not separated from the bond. The market value is based on the forward price of aluminium, discounted at the interest rate of the currency in question in addition to an appropriate counterparty risk margin.

Inventories	Reykjavik	Reykjavik
	Municipal	Group
40. Inventories are specified as follows:	(A operations)	(A and B operations)
Inventory of materials	0	610,407
Raw material	0	244,390
Supplies in stock	0	73,870
Products ready for use	0	34,320
	0	962,988

# **Current receivables**

<b>41.</b> Provisions for current receivables are specified as follows:	Reykjavik Municipal (A operations)	Reykjavik Group (A and B operations)
Provision for receivables other than tax revenue at the beginning of the year	203,000	745,553
Actual losses during the year	(85,270)	(221,657)
Provision for losses during the year	125,270	225,676
Provision for receivables other than tax revenue at year-end	243,000	749,572

Outstanding tax revenue, excluding default interest and provisions, amounted to ISK 11,643 million at year-end. A provision is recognised as a reduction in tax revenue and an amount of ISK 394 million is written off in the financial statements. The total provision for tax revenue at year-end amounted to ISK 5,713 million.

Cash and bank deposits	Reykjavik Municipal	Reykjavik Group
42.	(A operations)	(A and B operations)
Net cash is specified as follows:		
Short-term securities, redeemable without prior notice	4,423,253	5,777,147
Bank balances	1,173,696	10,393,356
	5,596,949	16,170,503
Bank deposits, available from 3-12 months	0	554,381
	5,596,949	16,724,884

Equity	Reykjavik Municipal	Reykjavik Group
43. Changes in equity:	(A operations)	(A and B operations)
Equity 1.1.2015	87,644,054	205,978,100
Adjusted accrued vacation obligations from the previous year	(230,555)	(230,555)
Adjusted from previous year due to split-up of Orkuveita Reykjavíkur	0	315,771
	87,413,499	206,063,316
Changes in the market value of equity shares	0	640,742
Re-evaluation of fixed assets	0	8,549,519
Translation differences of Orkuveita Reykjavikur	0	985,244
Other changes	0	48,177
Operating result for the year	(13,635,637)	(4,979,556)
Equity 31.12.2015	73,777,863	211,307,443

Vacation obligations are for the first time estimated using data from *Vinnustund*, a payroll software which includes information on working time and vacation rights for all employees of the city of Reykjavík. Underreported vacation obligations at the beginning of the year are recognised as equity.

Deferred income tax liability and assets of Orkuveita Reykjavíkur at the beginning of 2014 were adjusted to reflect a redistribution of taxable tangible assets between companies in the OR group. This correction increased equity at the beginning of 2014 by ISK 316 million.

#### **Pension obligations**

**44.** The net present value of the pension obligations of A operations due to LsRb (Reykjavik employees' pension fund) amounted to ISK 27,920 million at the end of 2015, while the net present value of A and B operations amounted to ISK 28,488 million, taking into consideration the share in the pension fund's net assets. The benefit rights largely follow wage changes and are adjusted based on a 2% interest rate, but in other respects a 3.5% interest rate is used for adjustment.

In evaluation of the pension obligations of A operations due to LsRb, assumptions about mortality rate and life expectancy are made in accordance with a proposal from the Icelandic Acturarial Society dating from 1 March 2015. The LsRb acturarial valuation uses existing mortality and life expectancy tables from the year 2012, which are based on experience from the years 2007-2011. The amendment of 1 March 2015 proposes a new methodology in estimating mortality rate and life expectancy by assuming that the mortality rate will continue to decrease and that average life expectancy will increase over the next decades instead of using the experience of previous years. It is the assessment of management that this new methodology provides a clearer view of the pension obligations of A operations at year-end 2015 and that the City is required to take this into consideration in order to comply with the Financial Stataments Act, even though this new methodology is not yet effective under current acturial valuation regulations of pension funds. The management assessment is based, among other things, on the fact that LsRb is closed to new members. The effect of this change in the mortality rate assumptions is estimated at ISK 6,509 million for A operations and A and B operations. It is the opinion of management that the obligation would be underestimated by this amount if the mortality rate and the life expectancy figures from the years 2007-2011 were to be used and if increasing life expectancy in the future were not taken into consideration.

The evaluation of the obligation of A operations takes account of the effect of collective bargaining agreements which were approved during the last quarter of 2015, but were not included in the acturarial valuation. The effect of these changes on the obligations of A operations and A and B operations amounted to an increase of ISK 1,580 million. The evaluation of the obligations was done by LsRb's actuary using the same methodology as in the acturarial valuation with the modified assumptions mentioned above.

The obligations are specified as follows:	Reykjavik Municipal	Reykjavik Group
	(A operations)	(A and B operations)
Pension obligations 1.1.2015	15,081,096	15,626,360
Contributions to pension payments during the year	(1,784,104)	(1,804,960)
Change in pension obligations resulting from modified LsRb actuarial valuation	6,534,858	6,578,110
Change in pension obligations resulting from modified assumptions regarding wage rate changes	1,579,605	1,579,605
	21,411,455	21,979,116
Changes in pension obligations resulting from modified assumptions regarding mortality rate	6,508,573	6,508,573
Pension obligations 31.12.2015	27,920,028	28,487,689
Pension obligations, short-term	2,068,400	2,093,400
Pension obligations, long-term	25,851,628	26,394,289
	27,920,028	28,487,689

#### 44. Pension obligations, cont.:

Estimated payments in 2016 due to pension obligations are recognised among current liabilities in the Balance Sheet.

Estimated future pension payments for Reykjavik Municipal by period:

Payments 2016-2020	4,544,060
Payments 2021-2025	5,013,104
Payments 2026-2030	5,253,793
Payments 2031 and later	13,109,071
	27,920,028

In 2007 the operating fund made a payment on its pension obligation to LSR with securities deriving from the sale of Landsvirkjun. The pension fund keeps this payment separate from other assets of the fund when calculating the City's pension obligations.

**45.** A new actuarial survey conducted by the actuary of the Local Government Employee Pension Fund (LSS) has been made available for the year 2014, which shows that premiums need to be increased by almost 4.51 percentage points in order to meet pension obligations. The statutes of the pension fund stipulate that the premium for members of the fund should be 4% of wages and the premium (countercontribution) paid by employers should be 12%, but that these numbers should be reviewed annually in accordance with an actuarial survey. If the employers' premium had been increased by the board of the pension fund at the beginning of 2014, the A operations' expenditure would have increased by ISK 785 million in 2014. According to the appraisal the total assets of the fund amounted to ISK 140 billion, and obligations amounted to ISK 160 billion. Obligations in excess of assets thus amount to ISK 20 billion, or 12.5% of the obligations.

# Long-term liabilities

Comparison   Com	<b>46.</b> Long-term liabilities are specified as follows:	Reykjavik Municipal	Reykjavik Group

2020	807,250	807,250
Later	8,991,970	8,991,970
	12,844,518	12,844,518

The lease agreement of Orkuveita Reykjavíkur for its headquarters is not included in lease liabilities but recognised in accordance with international accounting standard IAS 17, see note 59.

Other information on lease contracts:		<b>Book value</b>
	Lease period	31.12.2015
Sports facilities	2006 - 2035	5,198,816
Office buildings	2002 - 2032	6,159,095
Other facilities	2007 - 2030	1,486,607
		12,844,518

Minimum payments on lease contracts are specified as follows, not at net present value:

	 Sports facilities	Office buildings	Other facilities	Total
2016	 787,519	619,344	176,704	1,583,567
2017	 787,519	619,344	170,146	1,577,009
2018	 787,519	619,344	160,964	1,567,827
2019	 787,519	619,344	160,964	1,567,827
2020	 787,519	619,344	138,944	1,545,807
Later	 7,079,058	7,049,360	581,132	14,709,550
Total	 11,016,653	10,146,080	1,388,854	22,551,587

Total payments on lease contracts amounted to ISK 1,600 million in 2015 and are specified as follows in the financial statements:

	Reykjavik Municipal	Reykjavik Group
	(A operations)	(A and B operations)
Payments reducing lease liabilities	674,108	674,108
Interest payments	472,015	472,015
	1,146,123	1,146,123
Operating expenses	454,037	454,037
Total lease payments	1,600,160	1,600,160

#### Other current liabilities

48. Past due derivative agreements of Orkuveita Reykjavikur are recognised among other short-term liabilities of Reykjavik Group. The agreements have not been settled as lawsuits are currently in progress and there is significant uncertainty regading the proper settlement of these agreements. ISK 740 million have been debited in respect of these agreements in previous periods in the accounts of Orkuveita Reykjavikur. Those provisions do not constitute an admission of the debt on the part of Orkuveita Reykjavikur, and the figure could increase or decrease when the agreements will be settled.

# **Taxes**

# 49. Deferred income tax assets and liabilities:

B operation companies are partially or wholly subject to payment of income tax and income tax for these companies is calculated and recognised in the financial statements. The balance of financial items in the tax return, on the one hand, and the financial statements, on the other hand, results in the formation of either deferred income tax assets or liabilities.

Companies in B operations for which income tax is calculated are: Orkuveita Reykjavikur, Slökkvilið höfuðborgarsvæðisins bs, Íþrótta- og sýningarhöllin hf and Malbikunarstöðin Höfði hf.

	Deferred tax assets	Deferred tax liabilities
Balance at the beginning of the year	2,727,075	4,698,962

# Other

- **54.** Orkuveita Reykjavikur has followed an action plan referred to as "The Plan", that was prepared in collaboration with its owners from the spring of 2011. The Plan included a number of very ambitious goals on restraints in operation and a reduction in investments, as well as approved adjustments to the company's tariff, sales of assets and loans from the owners. The action plan has been successful.
- 55. Electricity sales contracts with Norðurál Helguvík

Orkuveita Reykjavíkur has fully honoured the first part of an agreement on the sale of energy to Norðurál Helguvík, (NH) but there has been a disagreement since 2009 as to whether Orkuveita Reykjavíkur is under obligation to deliver further energy in excess of the energy that has already been delivered. NH has not taken any legal action, but has reserved the rights to make demands on Orkuveita Reykjavíkur regarding the delivery of further energy and/or compensation for an alleged loss that occured as a result of the energy not being delivered. Orkuveita Reykjavíkur has rejected the validity of any such claims. Nothing is certain regarding potential amounts or the consequences of possible lawsuits, but the risk has decreased according to Orkuveita Reykjavíkur's management. The situation will be reviewed when a conclusion has been reached in arbitration proceedings currently in progress between HS Orka and NH, where a similar contract and issues are being addressed. It is the assessment of the management of Orkuveita Reykjavíkur that there is no reason to enter any obligation in this regard in the financial statements .

# 56. Property valuation of Harpa

The Supreme Court has voided a ruling of the Appellate Real Property Assessment Committee dating from the year 2012, whereby the Property Register's decision regarding the property valuation of Harpa Concert and Conference Hall from 2011 was confirmed. The Property Register subsequently cancelled the property valuation from 2011 to date and announced that it will re-evaluate Harpa's property valuation for the entire period in question. There is significant uncertainty regarding the prospective new property valuation. Under these conditions it is not possible to estimate whether claims resulting from Harpa's property tax in arrears are under- or overestimated in the municipality's financial statements.

# **57.** Value-added tax encumbrance.

Reykjavík Parking Services own a share in Harpa's parking garage. The parking garage is recorded in a special provision pursuant to Art. 6(4) of Act no. 50/1998 on value-added tax. The total value-added tax payable at year-end 2015 amounts to approximately ISK 197 million.

# 58. Litigation.

On 25 October 2013 the Minister of the Interior and the Mayor of Reykjavík signed an agreement which provided for the closure of the NE/SW runway (runway 06/24) at Reykjavík Airport. This was done at the same time that a site plan was advertised for Reykjavík airport. In order to enforce the agreement the City of Reykjavík took legal action against the State of Iceland and Isavia ohf as nominal defendant, by issuing a subpoena on 1 February 2016, as the development of the Hlíðarendi area is dependent on the closure of the runway. On 22 March 2016 the District Court of Reykjavík ruled in favour of the City of Reykjavík and upheld the City's contention that the Minister of the Interior was required to close the NE/SW runway (runway 06/24) at Reykjavík Airport and review the current rules on the organisation of the airport assuming a closure of the runway within 16 weeks from the date of the ruling, subject to payment of daily fines of ISK 1 million. It is impossible to estimate precisely the financial interests at stake in this case, but Reykjavík City's interests, and the interests of other stakeholders, with regard to the area are estimated in billions of ISK. The State of Iceland has appealed the District Court ruling to the Supreme Court. A hearing in the Supreme Court is scheduled for 1 June 2016 and a ruling will be made in that month.

Strætó bs. has been summoned to appear before the District Court by two parties that were not awarded a contract following a tender for transportation in the capital area in 2010. In one of the lawsuits the plaintiff claims damages for alledged loss of profit, while in the other lawsuit the plaintiff calls for an admission of liability. Strætó has rejected the claims. At the end of March 2016, the District Court ruled in the latter case and acknowledged the claims for loss of profit and the cost of participating in the pre-selection process. No decision has been made as to whether to appeal the case to the Supreme Court. It is anticipated that a court ruling in the first case will be made in the first half of 2016. It is the assessment of the management of Strætó that there is no reason to enter an obligation in the financial statements relating to these lawsuits

#### 59. Operating lease of Orkuveita Reykjavíkur's facilities

#### Orkuveita Reykjavíkur as lessee

#### Arrangement of the operating lease agreement of Orkuveita Reykjavíkur.

Orkuveita Reykjavikur concluded a 20-year lease agreement was Foss Fasteignafélag ehf. for the Groups headquarters at Bæjarháls 1 and Réttarháls at the end of 2013. The agreement includes an option to buy that Orkuveita Reykjavíkur can exercise after 10 years and 20 years. The rent for the first 10 years is ISK 223.9 million per year, indexed. If the option to buy is not exercised after 10 years, the minimum rent for the next 10 years will be ISK 290.2 million per year, indexed. The rent does not include any operating expenses and the amounts presented in the following tables have not been calculated at present value.

In the financial statements of the City of Reykjavík the operating lease agreement between Orkuveita Reykjavíkur and Foss Fasteignafélag ehf. is treated in accordance with international accounting standard IAS 17.

Operating lease payments and income for the year	2015	2014
Rent entered as expenses	257,040	262,565
Conditional lease	6,084	2,795
Forward lease entered as income	(48,048)	(47,203)
	215,076	218,157
Rent for non-terminable operating lease agreement		
Within the year	257,040	257,040
In 1 to 5 years	1,028,160	1,028,160
After 5 years	3,370,505	3,597,158
<u> </u>	4,655,705	4,882,358
Expected future revenues from sub-leasing	197,442	172,522

#### Orkuveita Reykjavikur as lessor

Orkuveita Reykjavikur has entered into an agreement for the sub-lease of a part of leased real estate for a period of five years with an option to extend to ten years.

#### Expected future revenues from non-terminable operating lease agreements

Within the year	48,437	48,048
In 1 to 5 years	140,535	124,474
After 5 years	8,470	0
	197,442	172,522

# Impact on the financial statements if opinion 1/2010 were to be applied to the lease agreement

The non-terminable lease debt under the lease agreement calculated to present value was on 31 December 2015 approximately ISK 1,551 million, and the value of the leased property was ISK 1,439 million. Interest expense and indexation during the year would have amounted to approximately ISK 99 million and depreciation of the leased property would have amounted to ISK 184 million.

# 60. Related parties

The City Council and the highest-ranking directors of the municipality are defined as parties related to the municipality. The spouses of these parties, financially dependent children and other financially dependent parties also fall within this definition, as well as companies owned or controlled by these parties.

The municipality has engaged in business with related parties during the year. Business with related parties included, among other things, general services provided by the municipality and public charges levied on related parties. The transactions are carried out on the same basis as in the case of unrelated parties and the terms and conditions of the transactions are similar as in the case of unrelated parties. The determination of business between related parties is subject to the competence rules of Art. 20 of the Local Government Act.

# **61.** Comparison of operating budgets.

The overview below explains the operating budget for 2015 pursuant to the originally approved budget of the municipality, approved annexes and original budget with annexes. The budget with annexes is shown in the Income Statement and other notes to the financial statements for comparison with the year's actual figures.
