

New Year's Eve at Klambratún

- Keep fireworks in a safe place, away from fire or other sources of ignition.
- Wear gloves to protect your hands.
- Remember the fireworks safety glasses - there will be some in the area for those who need them.
- Make sure the fireworks launch base is stable.
- Ignite the firework's fuse with an outstretched hand, and never lean over fireworks.
- Do not attempt to relight fireworks that have been lit before.
- Pay particular attention to the children. It is good to put earplugs on those who are sensitive to loud noises.
- Please remember that alcohol and fireworks do not mix!
